Professional Summary

Oracle Certified Professional (Java SE 17) and Full-Stack Software Engineer with a strong foundation in building scalable enterprise applications. Expert in Spring Boot 3, Microservices architecture, and Cloud technologies (Docker & Jenkins). Proven track record in ensuring software excellence through Tricentis Tosca and advanced automated testing methodologies. Passionate about writing clean, high-performance code and streamlining CI/CD pipelines to deliver robust, production-ready software solutions.

Technical Skills

- Programming languages: Java (17/21), Kotlin, TypeScript, JavaScript, SQL, C#
- Backend Development: Spring Boot 3, Spring Framework 6, ASP.NET Core.
- Frontend Development: React.js UI/UX Design (Figma).
- Testing & Quality: Katalon Studio, Tricentis Tosca (Certified Product Consultant), JUnit, Cypress, Swagger.
- DevOps & Tools: Azure DevOps, Docker, Jenkins, Git/GitHub, CI/CD Pipelines.
- Databases: PostgreSQL, MySQL, SQL, H2.

Professional Experience

QPROs | Quality Control Engineer — Oct 2025 – Present

- Automated front-end and enterprise CRM system workflows using Katalon Studio, implementing Object Repository scanning and building modular, reusable custom keywords.
- Developed and deployed 10+ automated UI test suites, establishing structured version control and team collaboration via Git and Azure DevOps.
- Executing manual test cases and performing exploratory testing to ensure system functionality aligns with business requirements.
- Managing the full defect lifecycle using Jira, ensuring efficient resolution and high software reliability.
- Leveraging Tricentis Tosca for advanced automation methodologies to optimize regression testing.

Network international — July 2024 – March 2025

- User Management System: Developed a full-stack system featuring secure JWT authentication, role-based access control, and user CRUD operations.
- Built and optimized backend microservices using Java 17 and Spring Boot 3 with PostgreSQL.
- Implemented CI/CD pipelines using Jenkins and containerized applications with Docker.
- Conducted unit/integration testing with JUnit and E2E testing with Cypress.

Technical Projects

ScholarMatchJo | University Capstone Project (HTU)

- Designed a web-based platform to match Jordanian students with scholarships based on eligibility.
- Built the backend with **Spring Boot** and frontend with **React**, featuring advanced search algorithms.
- Utilized **Figma** for UI/UX design, ensuring a user-friendly and responsive dashboard.

Certifications

- **Industry Certifications:** Oracle Certified Professional: Java SE 17| Tricentis Tosca Product Consultant
- Technical Development (Udemy): Java 17 Masterclass: 136+ Hours of Expert Lessons| Master Spring Boot 3 & Spring Framework 6 with Java| Complete ASP.NET Core and Entity Framework Development
- **Professional Skills (Udemy):** Microsoft Excel - Beginner to Advanced) | Mastering PowerPoint Presentation

Education

Bachelor's degree - Al Hussein Technical University (HTU) Computer Science — July 2025 | GPA 3.56

Languages

- English: Advanced Proficiency
- Arabic: Native
